

## Drug Testing

As a Third Party Administrator (TPA) for all drug testing services, BackCheck has partnered with laboratories and vendors across the US to provide this service alongside BackCheck's group of solutions. We offer lab-based 10-panel urine drug tests. Please contact your Account Executive for other testing options.

Candidates simply need to visit the lab closest to them with the appropriate Chain of Custody Consent forms and photo identification. The test is administered and results are then sent directly to you via BackCheck's secure web-based reports system within 2 to 4 business days depending on the nature of the results. As an optional service, BackCheck can arrange to have all positive drug tests reviewed by a Medical Review Officer (MRO). The MRO would contact the applicant if there are any discrepancies, such as a sample tainted through cough medicine or poppy seeds.

### 10 Panel Urine Drug Test Details

Urine testing is the most commonly preferred screening method. It is quick, accurate and reliable for detecting drug use within the past 72 hours. Included in your lab-based urine testing panel is a panel specifically testing for cleansing agents (adulterants) present in the urine samples. This ensures the validity of the samples and prevents any drug abuse cover-ups.

### Urine

#### 10 Panel:

Amphetamines	Barbiturates
Opiates	Benzodiazepines
Phencyclidine (PCP)	Methamphetamines
Marijuana Metabolites	Methadone
Cocaine Metabolites	Propoxyphene

#### Testing Format

Urine – 10 Panel

#### Turnaround Time

2 – 4 business days

\* Please contact your Account Executive for more information on alternative testing formats and optional MRO services.
